*First step to programming since 14 years old with HTML then Java.*

*Powerful Shell user with Zsh as my main shell, and Arch Linux as my desktop.*

*Prefer to use server-less HTML5 for lightweight front-end programming, python/bash for scripting and C/C++ for everything else.*

*Interested on programming languages development with small knowledge on many different programming languages (ruby, scala, lisp, perl,...).*

*FOSS contributor who prefer to write patches rather than reporting bugs.*
